adoption!** We are looking for
new maintainers. Visit our
Adopt a Plugin initiative for
more information.

1.9.1

Uninstall

Blame Upstream Committers

A simple plugin that allows
downstream jobs to mail
upstream committers when the
build fails.

1.2

Uninstall

Bootstrap 4 API Plugin

Provides Bootstrap 4 for Jenkins
plugins.

4.6.0-3

Uninstall

Bootstrap 5 API Plugin

Provides Bootstrap 5 for Jenkins
plugins.

5.1.3-4

Uninstall

bouncycastle API Plugin

This plugin provides a stable API
to Bouncy Castle related tasks.

2.25

Uninstall

Branch API Plugin

This plugin provides an API for
multiple branch based projects.

2.7.0

Uninstall

Build Blocker

1.7.7

Uninstall

This plugin blocks a build if one
of the given jobs is running. The
blocking behaviour can be
configured to block builds on
node or global level and to scan

the queue and block if blocking
jobs are about to run.

Build Environment Plugin

Build Environment Plugin

This plugin shows information about the environment in which

there environments.

Build Failure Analyzer

Jenkins Build Failure Analyzer Plugin

2.1.0

Uninstall

Build History Manager

Allows to build complex rules to decide which builds should be deleted from the history. Build number, age, result (status) and many more rules can be used as a factor. Visit wiki to check list of available features.

1.4.0

Uninstall

Build Monitor View

Provides a highly visible view of the status of selected Jenkins jobs. It easily accommodates different computer screen sizes and is ideal as an Extreme Feedback Device to be displayed on a screen on your office wall.

1.13+build.202201201901

Uninstall

Build Name and Description Setter

This plug-in sets the display name and description of a build to something other than #1, #2, #3, ...
Now also with support for build description and pipeline approach.

2.2.0

Uninstall

Build Pipeline Plugin

1.5.8

Uninstall

This plugin renders upstream and downstream connected jobs that typically form a build pipeline. In addition, it offers the ability to define manual triggers for jobs that require intervention prior to execution, e.g. an approval process outside of Jenkins.

Warning: The currently installed plugin version may not be safe to use. Please review the following security notices:

Cloud Statistics Plugin

Report Jenkins dynamic

statistics

CloudBees AWS Credentials

Allows storing Amazon IAM credentials within the Jenkins Credentials API. Store Amazon IAM access keys (AWSAccessKeyId and AWSSecretKey) within the Jenkins Credentials API. Also support IAM Roles and IAM MFA Token.

1.29

Uninstall

CMake plugin

Integrates the **CMake tool suite** to Jenkins. Supports to build cmake based projects.

4.1.1

Uninstall

Cobertura Plugin

This plugin integrates **Cobertura coverage reports** to Jenkins.

1.17

Uninstall

Code Coverage API Plugin

This plugin serves as API to integrate and publish multiple coverage report types.

2.0.4

Uninstall

Collapsing Console Sections Plugin

Annotations to collapse sections of the build console

> **This plugin is up for adoption!** We are looking for new maintainers. Visit our **Adopt a Plugin** initiative for more information.

1.8.0

Uninstall

Command Agent Launcher Plugin

Allows agents to be launched using a specified command.

1.6

Uninstall

Compact Columns

More compact columns for showing last success and failure. Easier to understand, and takes less room in your view.

1.13

Uninstall

Compress Artifacts Plugin

1.10

Uninstall

Keeps build artifacts compressed to save disk space on the master.

Conditional BuildStep

A buildstep wrapping any
number of other buildsteps,
controlling their execution

☑

**This plugin is up for
adoption!** We are looking for
new maintainers. Visit our
Adopt a Plugin initiative for
more information.

1.4.1

Uninstall

Config File Provider Plugin

☐

Ability to provide configuration
files (e.g. settings.xml for maven,
XML, groovy, custom files,...)
loaded through the UI which will
be copied to the job workspace.

3.8.1

Uninstall

Configuration as Code Plugin

☐

This plugin allows configuration
of Jenkins based on human-
readable declarative
configuration files.

1.55.1

Uninstall

**Configuration as Code Plugin -
Groovy Scripting Extension**

☐

Extension for Configuration as
Code that allows running Groovy
scripts.

Adopt a Plugin initiative for
more information.

Environment Script Plugin

☐ Allows a script to be executed

| | Allows a script to be executed before a build, printing environment variables to be set. | 1.2.6 | | **Uninstall** |

	Adds extended functionality to Choice parameter	0.82		Uninstall
	Extended Read Permission Plugin			
	This plugin enables various Extended Read permissions in Jenkins for jobs, system configuration, etc.	3.2		Uninstall
	External Monitor Job Type			
	Adds the ability to monitor the result of externally executed jobs	1.7		**Uninstall**
	Extra Columns Plugin			
	This is a general listview-column plugin that contains columns like: Test Result, Configure Project button, Disable/Enable Project button, Project Description, Build Description, SCM Type & Cron Trigger.	1.25		**Uninstall**
	eXtreme Feedback Panel			
	Adds an eXtreme Feedback View intended to be used on large panels to monitor the status of the selected jobs.	2.0.1		**Uninstall**
	Fail The Build Plugin			
	Change the build result to help testing job configuration	1.0		**Uninstall**
	Favorite			
	This plugin allows users to favorite a job.	2.3.3		**Uninstall**
	Fingerprint Plugin			
	Adds the ability to fingerprint files as build steps.	1.2		**Uninstall**
	FLOW Plugin			
	Adds integration to FLOW - http://startflowing.net	1.3		**Uninstall**
	Folders Plugin	6.17		Uninstall
	This plugin allows users to create "folders" to organize jobs. Users can define custom taxonomies (like by project type, organization type etc). Folders are nestable and you can define views within folders. Maintained by CloudBees, Inc.			

Font Awesome API

☑ **Font Awesome API**

Provides the free fonts of Font Awesome for Jenkins plugins.

5.15.4-5

Uninstall

☐ Defines an API for Jenkins to mine and analyze data from a source code repository.

1.7.0

Uninstall

☐ **Git Changelog**

Creates a highly configurable changelog, or relasenotes, from Git.

3.0

Uninstall

☐ **Git client plugin**

Utility plugin for Git support in Jenkins

3.11.0

Uninstall

☐ **Git Parameter Plug-In**

Adds ability to choose branches, tags or revisions from git repositories configured in project.

0.9.14

Uninstall

☐ **Git plugin**

This plugin integrates **Git** with Jenkins.

4.10.3

Uninstall

☐ **GIT server Plugin**

Allows Jenkins to act as a Git server.

1.10

Uninstall

☐ **Gradle**

This plugin allows Jenkins to invoke **Gradle** build scripts directly.

1.36

Uninstall

☐ **graphiteIntegrator**

This plugin allows you to send these metrics : number of tests, tests skipped, tests failed, build duration, cobertura total line coverage and cobertura total branch coverage to one or more graphite servers. If you don't have a graphite server you can use : https://www.hostedgraphite.com to test. For cobertura metrics you need to install cobertura plugin and run cobertura:cobertura in goals section. Be sure to run jenkins in a Jdk 7, because the plugin only works with this version of jdk.

Uninstall

external processes that may
survive a Jenkins restart or agent
reconnection.

☐ Provides a REST API to access
pipeline and pipeline run data. | 2.20 | Uninstall

Pipeline: SCM Step

☐ Adds a Pipeline step to check
out or update working sources
from various SCMs (version
control). | 2.13 | Uninstall

Pipeline: Shared Groovy Libraries

☐ Shared libraries for Pipeline
scripts. | 2.21 | Uninstall

Pipeline: Stage Step

☐ Adds the Pipeline step `stage` to
delineate portions of a build. | 291.vf0a8a7aeeb50 | Uninstall

Pipeline: Stage Tags Metadata

☐ Library plugin for Pipeline stage
tag metadata. | 1.9.3 | Uninstall

Pipeline: Stage View

☐ Pipeline Stage View Plugin. | 2.20 | Uninstall

Pipeline: Step API

☑ API for asynchronous build step
primitive. | 622.vb_8e7c15b_c95a_ | Uninstall

Pipeline: Supporting APIs

☑ Common utility implementations
to build Pipeline Plugin | 813.vb_d7c3d2984a_0 | Uninstall

Plain Credentials

☐ Allows use of plain strings and
files as credentials. | 1.7 | Uninstall

Plugin Usage - Plugin

☐ This plugin provides the
possibility to analyze how often
a plugin is being used in your
jobs. | 2.1 | **Uninstall**

Plugin Utilities API

☑ Provides several utility classes
that can be used to accelerate
plugin development. | 2.12.0 | Uninstall

Popper.js 2 API Plugin | 2.11.2-1 | Uninstall

☑ Provides Popper.js 2.x for
Jenkins plugins.

Popper.js API Plugin

☑ Provides Popper.js for Jenkins
plugins. | 1.16.1-2 | Uninstall

Post build task

output.

PostBuildScript Plugin

☐   A plugin for the Jenkins CI to run several configurable actions after a build, depending on the build result.   3.0.0   **Uninstall**

Prism API

☐   Provides Prism JS Source Code Highlighting for Jenkins plugins.   1.25.0-2   Uninstall

Python Plugin

☐   Adds the ability to execute python scripts as build steps.   1.3   **Uninstall**

Rebuilder

☐   This plugin is for rebuilding a job using the same parameters.   1.33   **Uninstall**

Regex Email Plugin

☐   This plugin resolves user email addresses using regular expressions.   0.3   **Uninstall**

Resource Disposer Plugin

☐   Dispose resources asynchronously. Utility plugin for resources that require more retries or take a long time to delete.   0.17   Uninstall

Robot Framework plugin

☐   This publisher stores **Robot Framework** test reports for builds and shows summaries of them in project and build views along with trend graph.   3.0.1   **Uninstall**

Role-based Authorization Strategy

☐   Enables user authorization using a Role-Based strategy. Roles can be defined globally or for particular jobs or nodes selected by regular expressions.   3.2.0   Uninstall

☑   ### Run Condition Plugin   1.5   Uninstall

Define conditions for the execution of build steps

1.3

Uninstall

View Job Filters

Create smart views with exactly
the jobs you want. Your smart
views can automatically include
or exclude jobs by using things
like the SCM path or type, the
job type, build statuses or trends
or triggers, relevance to the
logged-in user, email recipients,
Maven configuration, job
parameterization, and user
permissions. Mix and match
filters to narrow down to exactly
what you want.

2.3

Uninstall

ViewVC Plugin

This plugin integrates **ViewVC
browser interface for CVS and
Subversion** to Hudson. Entries in
change logs will by hyperlinked
to the specified files/diffs in
ViewVC.

1.7

Uninstall

Warnings Next Generation Plugin

This plugin collects compiler
warnings or issues reported by
static analysis tools and
visualizes the results. It has built-
in support for many compilers
(cpp, clang, java, ...) and tools
(spotbugs, pmd, checkstyle,
eslint, phpstan, ...), see the list of
supported report formats.

9.11.0

Uninstall

WMI Windows Agents

Allows you to connect to
Windows machines and start
slave agents on them.
